SUMMARY

Full Stack Software Developer with hands-on experience building and shipping production-ready web applications using React, Node.js, and MongoDB. Demonstrated ability to own product features end-to-end, architect JWT-authenticated RESTful APIs, and deliver user-focused systems independently, including a live public-facing website in an ongoing freelance engagement. Seeking a backend or full-stack product engineering role where strong product ownership, backend fundamentals, and thoughtful frontend execution can help build lovable, user-centered products.

SKILLS

Languages: Java, JavaScript, TypeScript, HTML, CSS

Frontend: React.js, Next.js, React Router, Tailwind CSS, Ant Design, Mantine, Lucide React, Responsive Design

Backend: Spring Boot, Node.js, Express.js, RESTful APIs, JWT, Bcrypt, CORS, Cookies

Databases & ORM/ODM: PostgreSQL, MongoDB, Hibernate, JPA, Mongoose

Testing: Vitest

Cloud & Deployment: Amazon S3, Cloudinary, Vercel, Render, Docker

Developer Tools: Git, GitHub, Postman, node, npm, Maven

Utilities: Axios, Joi, Lodash, Multer, JSON

Project Management: Agile, Scrum, Jira, SDLC

PROJECTS

INVENTORY TRACKER — *React, JavaScript, Express.js, MongoDB*

Feb 2026

[Link to Website](#) | [GitHub Repository](#)

- Engineered and shipped a production-ready full-stack inventory management system supporting 3 user roles (admin, manager, viewer) with JWT authentication and RBAC authorization, enabling secure, role-specific workflows.
- Designed and implemented 6+ modular product features with dynamic routing and 10+ reusable UI components, improving usability and maintainability across core workflows.
- Architected a RESTful API with centralized validation, structured error handling, and modular route organization to support scalable product feature development.
- Deployed and maintained the full system across two cloud platforms, with the frontend on Vercel and the backend on Render, ensuring reliable uptime for a live, publicly accessible application.
- Managed image uploads and storage integration via the Cloudinary API, supporting dynamic product and inventory asset management.

GYM APPAREL STORE — *JavaScript, Express.js, Express EJS Layouts, MongoDB*

Apr 2025

[GitHub Repository](#)

- Built and deployed a full-stack e-commerce platform with product listings, a shopping cart, and order management.
- Implemented server-side validation and automated transactional email notifications using Mailgun, improving checkout reliability and user communication.
- Configured environment variables for secure credential management and deployed the application to Vercel, maintaining a production-ready build pipeline.
- Structured the application using the MVC design pattern with RESTful routing, resulting in a modular, maintainable codebase aligned with industry standards.

EXPERIENCE

Web Developer, *Municipality of San Lorenzo Ruiz, Philippines, Freelance* Remote, **Mar 2026 – Present**

- Independently designing and developing an 8+ section municipal government website using React.js, Next.js, TypeScript, Tailwind CSS, and a Java Spring Boot REST API backend.
- Built backend systems with Spring Boot, PostgreSQL, Hibernate, and JPA to manage 5+ admin workflows, including news CRUD, featured announcements, article images, and draft/published content statuses.
- Integrated Amazon S3 for scalable image storage and Dockerized the full-stack application to support easier deployment, maintenance, and future developer handoff.
- Led the full development lifecycle as the sole developer, from UX/UI design and information architecture to frontend implementation, backend development, API integration, deployment planning, and website maintenance.

Technology Support Specialist, *Freelance* Toronto, **Oct 2025 – Present**

- Provided one-on-one technical support to elderly clients, diagnosing and resolving hardware, software, and network connectivity issues across Windows, iOS, and Android devices.
- Educated clients on device setup, application usage, and digital security practices, consistently translating technical concepts into clear, accessible language for non-technical users.

Resort Administrator, *Casa Del Rio Private Resort, Philippines* Remote, **Aug 2023 – May 2025**

- Maintained digital records across reservations, guest profiles, and operational data, ensuring accuracy and accessibility for a resort serving peak-season clientele.
- Designed and implemented digital booking workflows that reduced manual coordination errors and improved operational efficiency across the reservation process.

EDUCATION

SENECA POLYTECHNIC

Diploma in Computer Programming (Software Development)

Cumulative GPA: 3.4/4.0

Relevant Coursework: Software Testing, Software Engineering; Software Design; Data Structure & Algorithms

Toronto, ON

Aug 2025

CERTIFICATIONS

- **CompTIA ITF+**
